

Transport

Digital displays help you to provide real-time travel updates, warning of adverse conditions and raise security alerts.

- Provide local information specific to each location
- Use live data feeds for up to the second information
- Show local area information
- Direct customers to alternative services during congestion
- Manage major disruptions

Where can you use LiveSpace digital signage?

Transport hubs

Touchscreen timetables

Arrival and departure information

Summarise road, rail, bus and other service statuses

Interactive screens to help commuters seeking alternative solutions to destinations

On the street

Arrival and departure information

Maps with traffic flows and congestion spots

Interactive screens with transport summaries for commuters

LiveSpace makes your messages unmissable...

LiveSpace digital signage helps increase sales and keep people informed.

Respond to local opportunities

Localisation lets head office create and manage a list of promotions. Local managers are then free to choose the best offer for their local audience.

Zone your content

LiveSpace's grouping feature lets you zone your content. People in different areas of your buildings will see the right messages for them.

Exploit the power of live data

LiveSpace manages multiple data feeds and makes sure the offers you show match your customers' needs. Let your messages respond to changes in your data.

Start your risk-free LiveSpace trial today

Our 60-day risk-free trial provides you with the opportunity to see how LiveSpace works.
